Description

Low frame-rate/slow playback of YouTube

If you play Youtube on a PC or RK3288 video playback/framerate looks very fast and smooth.

But on RK3368 it looks slower and not so smooth but still watchable.

Any way to speedup frame-rate or improve playback of Youtube on RK3368?

If Youtube is played in a window it looks normal but 720p/1080p Youtube in fullscreen looks slower and not very smooth.

History
